# QSFP28-ZR4

- This MSA compliant 100GBASE-ZR4 offers breakthrough performance achieving 80km distances with only 5.5 watts of power consumption.

- Applications include 100G Ethernet for data center interconnect and cable or telecom network links that need a 30db link power budget

- Now network operators can simply plug a QSFP28 optic into popular top of rack switches and achieve much longer link distances: 65Km distance w/o FEC or 80Km w/FEC
