Optical Transport Hot Product

Whitebox L0/L1 transponder, High capacity-density for long transmission, Pay as you grow, with simple, reliable & convenient operation/ management

- 1RU, 3.2Tbps total capacity
- Modular design with slots for up to 4 sled modules
- Three types of sleds to meet application & client interface needs
- Utilizes pluggable transceivers on both client & line interfaces
- 100G/200G per wave

Coherent transmission optimized Open Line System, Enables transmission of unrepeated 3,000Km+ @100G

- Modular design with 3 sled slots, integrates OA (FGA, VGA), OLP, OTDR, OCM, OSC and OLP function.
- Can be configured for Terminal and In-line applications.

Typical Optical Transport System/Applications
